Education

Chalmers University of Technology — Gothenburg, Sweden
M.Sc. Data Science & AI — *Aug. 2026 – June 2028 (expected)*
B.Sc. Automation & Mechatronics Engineering; ***GPA: 4.9/5.0*** — *Aug. 2023 – June 2026*
- Graduated with the **highest academic results in the programme**; awarded **Adlerbert (x2) & Mastercard scholarships**.

School of Business, Economics and Law, University of Gothenburg — Gothenburg, Sweden
B.Sc. Business Administration — *Aug. 2024 – June 2027 (expected)*

Experience

AI Intern — Nov. 2026 – Present
Ernströmgruppen — *Gothenburg, Sweden*
- Identify and evaluate **AI and automation** opportunities across sales, operations and acquisitions in a group of **50+ companies**.
- Build **prototypes and proofs of concept** with business units and assess the impact, feasibility and **ROI** of AI use cases.

Applied AI & Machine Learning Intern — June 2026 – Sep. 2026
Volvo Buses — *Gothenburg, Sweden*
- Built **MCP servers** and AI tooling that integrate internal Volvo systems with **agent-based workflows**.
- Developed **machine learning models** on large-scale bus time-series data to forecast **energy and power consumption**.
- Delivered a browser-based **AI agent extension** for internal applications as part of Volvo Buses' AI infrastructure.
- Offered a continued position within **AI, machine learning and agent infrastructure** after the internship.

Bachelor Thesis in Vehicle Software Verification — Jan. 2026 – May 2026
Volvo Buses & Chalmers University of Technology — *Gothenburg, Sweden*
- Developed a **CAN-based vehicle simulation tool** in **Python** enabling **shift-left verification** of bus software in a **HIL** lab environment.
- Built a **vehicle dynamics model** simulating velocity, acceleration, gear selection, engine speed and steering, with a **real-time GUI**.
- Encoded **DBC-defined CAN messages** with **python-can** over a **Vector** interface; verified in virtual CAN and on the rig with **CANalyzer**.
- Thesis extended into a **full-time role** (May–June 2026): **CANoe** integration in a larger test environment and advanced **AEBS** tests.

Platform Development Intern — June 2025 – Sep. 2025
Volvo Buses — *Gothenburg, Sweden*
- Developed software concepts in agile teams, including the **Next-Gen Driver Interface** (see Projects).
- Engineered **automated testing** for SystemWeaver and conducted a technical **competitor analysis** to drive platform improvements.

Management Consultant — Jan. 2025 – July 2025
HandelsConsulting — *Gothenburg, Sweden*
- Delivered strategic consulting projects focused on **process mapping**, efficiency improvements and **digital transformation**.
- Won **1st place** in the company sales competition, surpassing **150% of the 3-month target** within 5 weeks.
- Offered **promotion to Business Area Manager** and awarded the **honorary medal "Driv"** for exceptional initiative.

Group Leader System Technician — Aug. 2022 – June 2023
Swedish Armed Forces — *Halmstad, Sweden*
- Led a technical squad operating and troubleshooting **advanced radio systems** under demanding conditions.

Leadership & Entrepreneurship

Founder, CEO & CTO — Oct. 2025 – Present
CampusLyan Nordics AB — *Gothenburg, Sweden*
- Founded and incorporated the company to build **Sweden's student housing platform**.
- Secured **pre-launch pilot agreements** by selling the platform vision, creating financing runway for several years.
- Signed agreements with **one of Sweden's largest student housing companies** and several municipal housing companies.

President & Group CEO — June 2025 – Aug. 2026
HandelsFöretagen — *Gothenburg, Sweden*
- Executive responsibility for a 6-subsidiary organization with **180+ employees** across strategy, finance and operations.
- Delivered the strongest year in group history: **SEK 8.36M revenue (+36% YoY)** and **SEK 2.11M profit (+637% YoY)**.
- Turned **4 subsidiaries profitable**; every group company ended positive and group margin rose from **4.6% to 25.2%**.

Selected Projects

Next-Gen Driver Interface | *Python, Kotlin, Java* — June 2025 – Aug. 2025
- Designed a future-oriented driver environment concept focused on **intuitive interaction** and safety.
- Engineered a **mobile application** integrated with vehicle hardware via **microcontrollers** for a fully functional live demo.

StuNote | *Next.js, TypeScript, MySQL, PHP, AI Integration* — Apr. 2024 – Mar. 2025
- Founded and engineered an EdTech platform with a literature marketplace, note sharing and **AI-generated** study quizzes.
- Recognized with multiple honors for technical **innovation**.

Further projects at simon-portfolio-wine.vercel.app/en/projects and github.com/SimonC03.

Skills

Programming: Python, C/C++, TypeScript, Java, Kotlin, SQL (PostgreSQL/MySQL), MATLAB/Simulink
AI & Data: Machine Learning, Time-Series Forecasting, MCP Servers & AI Agents, Data Structures & Algorithms
Engineering: Embedded Systems, Microcontrollers, CAN/DBC, Vector CANoe/CANalyzer, HIL, PLC, Control Theory, SystemWeaver, Catia V5
Web & Cloud: React, Next.js, Node.js, REST APIs, AWS, Google Cloud Platform (GCP), Docker, Git, TailwindCSS, Figma
Business: Agile Methodologies, Financial Analysis (Excel/VBA), Strategic Planning
Languages: Swedish (native), English (fluent), French (basic)

Honors & Memberships

Honors: **Nova 111 Student List 2026**, selected as one of Sweden's **top 10 engineering students** from 1,000+ applicants
Memberships: Nova, Chalmers AI Society, Chalmers Börssällskap, Unga Aktiesparare
